SPRING '26

The Voice project is entering its most visible phase!

After almost a year of collaborative research, needs assessment and curriculum development across four European countries, the VOICE project has reached a turning point. All 13 training modules are finalised, translations are underway in five languages, and the open platform at voice-inclusion.eu is live and already attracting thousands of visitors.

SOCIAL INNOVATION
INITIATIVES MAPPED

Across Europe, millions of people displaced by conflict face the same paradox: they are educated, skilled and motivated — but locked out of the labour market by language barriers, unrecognised qualifications and a lack of targeted support. VOICE was built to change that.

“Refugees are considered merely as short-term labour force – meaningful support for long-term integration strategies is urgently needed.”

– VOICE WP2 Country Report, Italy, 2025

VOCATIONAL TRAINING CURRICULUM

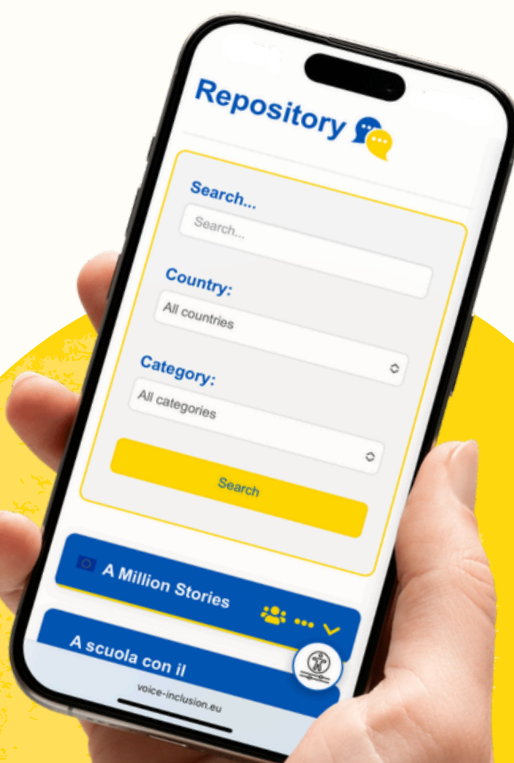

All **13 VOICE training modules** have been drafted, reviewed and are now entering translation phase. The curriculum covers digital skills, labour market navigation, language support and intercultural competencies. All **designed specifically for refugees**, local citizens, and the practitioners supporting them.

PLATFORM DEVELOPMENT

The VOICE online platform — the central hub for accessing training resources, connecting with Associated Partners, and tracking project outputs — is live and growing. The full multilingual training library will be available there by end of **April 2026**.

ASSOCIATED PARTNER NETWORK

Since opening the call for Associated Partners, we have welcomed organisations from education, employment services, civil society and local government across the partner countries. The network is growing. If your organisation would like to join, **now is the time**.
